D. getTraceAsString()

Q 10 - Which of the following method returns a formatted string representing a date?

A. time()

B. getdate()

C. date()

D. None of the above

PHP Online Quiz Answers

Q 1 - Is PHP whitespace sensitive?

A. false

B. true

Answer : A

false! PHP is whitespace insensitive means that it almost never matters how many whitespace characters you have in a row. one whitespace character is the same as many such characters.

Q 2 - Which of the following type of variables are instances of programmer-defined classes?

A. Strings

B. Arrays

C. Objects

D. Resources

Answer : C

Objects: are instances of programmer-defined classes, which can package up both other kinds of values and functions that are specific to the class.

Q 3 - Which of the following is correct about constants?

- A. To define a constant you have to use define() function.
- B. To retrieve the value of a constant, you have to simply specify its name.
- C. Both of the above.
- D. None of the above.

Answer : C

Both of the above options are correct.

Q 4 - Which of the following operator is used to concatenate two strings?

- A. .
- B. +
- C. append
- D. None of the above.

Answer : A

To concatenate two string variables together, use the dot (.) operator.

Q 5 - Which of the following is used to get information sent via get method in PHP?

- A. \$_GET
- B. \$GET

C. \$GETREQUEST

D. None of the above.

Answer : A

The PHP provides \$_GET associative array to access all the sent information using GET method.

Q 6 - Which of the following function returns selected parts of an array?

A. array_reverse()

B. array_search()

D. array_slice()

Answer : D

array_slice() – Returns selected parts of an array.

Q 7 - Can you assign the default values to a function parameters?

A. true

B. false

Answer : A

Yes! You can set a parameter to have a default value if the function's caller doesn't pass it.

Q 8 - Which of the following provides the actual name of the uploaded file?

- A. `$_FILES['file']['tmp_name']`
- B. `$_FILES['file']['name']`
- C. `$_FILES['file']['size']`
- D. `$_FILES['file']['type']`

Answer : B

`$_FILES['file']['name']` – it provides the actual name of the uploaded file.

Q 9 - Which of the following method of Exception class returns formatted string of trace?

- A. `getMessage()`
- B. `getCode()`
- C. `getTrace()`
- D. `getTraceAsString()`

Answer : D

`getTraceAsString()` method of Exception class returns formatted string of trace.

Q 10 - Which of the following method returns a formatted string representing a date?

- A. `time()`

- B. getdate()
- C. date()
- D. None of the above

Answer : C

The date() function returns a formatted string representing a date. You can exercise an enormous amount of control over the format that date() returns with a string argument that you must pass to it.
